Letter of Recommendation

It is my utmost pleasure to write a letter of recommendation for Jerrin Bright, with regard to his academic pursuits under your supervision. I have known Jerrin for the last 3 years both as a student and as one of the Robotics Team captains.

He is a soft-spoken, multi-talented and hardworking innovator, who founded Team ATOM Robotics, in VIT Chennai in the year 2019, that specializes exclusively in robotics. Today, the team consists of 50+ young enthusiasts in robotics from various domains and as a team, they have won more than 20 awards in robotics. I, being the faculty coordinator, have seen the commitment and hard-work he has put in to bring the team to its present standards.

He is currently doing his Under-Graduation in Mechanical Engineering, but has a multitude of goals empowered by his skills, which includes Designing and Simulations, Artificial Intelligence including ML and DL, Autonomous Navigation using ROS and Matlab, and Automation. He has excellent communication skills, and aspires to become a Robotics and Artificial Intelligence (AI) Researcher.

In addition to his excellent work for his team and in honing his skills, he has also worked with me in organizing several national-level competitions and events in the field of Robotics and AI, including ROBOPRIX 1.0 and 3.0, Workshop on ABB Robotics, and so on.

I personally believe that he will be an invaluable addition to your ongoing research projects. I thereby, willingly endorse Jerrin in his academic pursuits and wish him the very best. If you have any specific queries concerning Jerrin's experience and skills, I'd be glad to help.

With regards,

Dr. Arockia Selvakumar,
Senior Associate Professor
School of Mechanical Engineering
Faculty Coordinator/ Robotics Club & Teams
Vellore Institute of Technology, Chennai.
Tamil Nadu, India
