LETTER OF RECOMMENDATION

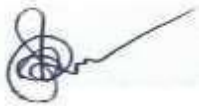

It is my utmost pleasure to write a letter of recommendation for Mr. Jerrin Bright, with regard to his application for the doctoral level of study in your esteemed university. I have known Jerrin for the last 3 years both as a student and as a robotics team captain.

He is a soft-spoken, multi-talented, and hardworking innovator, who co-founded the aforementioned Team ATOM, in VIT Chennai in the year 2019 that specializes exclusively in intelligent robotics and space exploration. Today, his team consists of 50+ young enthusiasts in robotics from various domains, and as a team; they have won more than 20 awards in various competitions. I, being the faculty coordinator, have witnessed the commitment and hard work he has put in to bring the team to its present standards.

He is currently doing his Under-Graduation in Mechanical Engineering but has a multitude of goals empowered by his skills, which include autonomous systems and perception. He has excellent communication skills and aspires to become an Autonomous Systems Researcher and I have witnessed his resolve towards his goal from day one. I would also like to emphasize Mr. Jerrin's magnificent time management skills. Handling academics along with the team's work and other side projects is a difficult task but he was able to pull it off. He used to manage his time very efficiently and worked meticulously to finish the work before the deadline. In addition to his excellent work for his team and in honing his skills, he has also worked with me in organizing several national-level competitions and events in the field of Robotics and AI, including ROBOPRIX, Workshop on ABB Robotics, and so on.

I am sure that he would give his best in the future also and will prove out to be an invaluable asset to your esteemed University. I would thereby like to strongly recommend Mr. Jerrin for the doctoral position he is seeking as he has a genuine interest in robotics and has a range of skills that will help him excel in this field. If you have any specific queries concerning Mr. Jerrin's experience and skills, I'd be glad to help.

Sincerely,

Dr. Arockia Selvakumar Arockia Doss
Senior Associate Professor,
School of Mechanical Engineering
Faculty Coordinator/ Robotics Club & Teams
Vellore Institute of Technology, Chennai.
Tamil Nadu, India
